The working capital requirement of product Maxol based on a target output of 1,000 unit per month is estimated at Rs.620,000.

## Required:

- (a) Indicate the bottom line selling price of production Maxol assuming that:
  - (i) Price is adequate to ensure contribution equivalent to 30% on investment made.
  - (ii) The product is a new product about to be introduced in market.
- (b) Calculate the selling price in a situation where product is well established in the market so as to yield return of 18% on investment.

# **CASE # 2**

Construct a common-size balance sheet of Jet Electro for the year 2008-09 and compare it with the common-size balance sheet for the industry as given below:

|  | Rs. In million |   | . In million |
|--|----------------|---|--------------|
|  | Jet Electro    |   | Industry     |
|  | Amount         | % | %            |
| Cash                                       | 20             |   | 4.5          |
| Marketable securities                      | 8              |   | 5.0          |
| Accounts receivable (net)                  | 22             |   | 3.2          |
| Inventory                                  | 18             |   | 2.5          |
| Prepaid expenses                           | 2              |   | 0.6          |
| Total current assets                       | 70             |   | 15.8         |
| Plant and equipment (net)                  | 366            |   | 84.2         |
| Total assets                               | 436            |   | 100.0        |
| Accounts payable                           | 16             |   | 6.2          |
| Salaries & wages payable                   | 4              |   | 2.0          |
| Notes payable                              | 30             |   | 3.3          |
| Taxes payable                              | 4              |   | 0.8          |
| Other payable                              | 4              |   | 0.9          |
| Total current liabilities                  | 58             |   | 13.2         |
| Long-term debt                             | 120            |   | 27.7         |
| Deferred taxes                             | 6              |   | 1.3          |
| Total long-term liabilities                | 126            |   | 29.0         |
| Ordinary shares                            | 84             |   | 18.1         |
| Additional paid-in capital                 | 76             |   | 19.1         |
| Retained earnings                          | 92             |   | 20.6         |
| Total shareholders equity                  | 252            |   | 57.8         |
| Total liabilities and shareholders' equity | 436            |   | 100.0        |

#### Required:

- (a) Identify the accounts which have been deviated from the industry norm.
- (b) Are these deviations necessarily undesirable? Discuss the reasons for these deviations.
