Lahore Branch Council 2019-21

# Session on Artificial Intelligence & Big Data

Data science has now become the most demanding job of the 21st Century. Petabytes of data are being generated every day which has given rise to the demand of data scientists and companies are becoming data companies very rapidly.

Lahore Branch Council, ICMA Pakistan has always come forward to provide a platform for personal and professional development of Members and Qualified CMAs/Students by organizing such programs for their capacity building, professional grooming and personality development. Keeping in view the importance of above The Lahore Branch Council (LBC) is organizing a Technical Session on "Artificial Intelligence & Big Data for the Professionals" at ICMA Campus, Lahore.

## Distinguished Speaker:

### Adnan Kazi

Chief Operating Officer

Analytics Private Limited and TenX AI

Adnan has around 15 years of professional experience working with top multinationals and fortune 500 companies including Teradata Corporation, IBM, NCR Corporation and TRG International and is currently leading Analytics Private Limited (APL), a premium Artificial Intelligence and Big Data Company as its Chief Operating Officer. Previously he was leading Teradata's business in Lahore where he was managing key government accounts including law enforcement entities. He has also worked with IBM as a Brand Sales Manager for Business Analytics Solutions responsible for leading the IBM Business Analytics brand in Pakistan and Afghanistan comprising Enterprise Risk Management, Predictive Analytics, Business Intelligence and Financial Performance Management solutions.

Being IBM, Oracle and Teradata certified in Sales and Consulting, Adnan has used his expertise to add value to several organizations in the telecommunication, manufacturing, government and other industries. He helps his customers from across the industries to achieve technology led business outcomes by making informed decisions through big data analytics. He translates the business problems into feasible consulting and technology solutions to help customers with this data driven decision making culture.

He frequently gets invited as a guest speaker, lecturer and panelist by top educational institutions and business forums in Pakistan. He holds a Bachelor of Science degree in Computer Sciences and several specializations in the field of Business Analytics and Sales. He has delivered and led complex and high impact Data Analytics projects in Pakistan, Bangladesh and United Kingdom.
