	-4:	No. 4			Marl
		No. 1			
1)	(i)	Costs of internal failure are money spen receives a product that has been found to be		a customer	01
		<b>Example:</b> Cost of products rejected during an	ny inspection process.		
	(ii)	<b>Costs of external failure</b> are money spent received a faulty product.	repairing a product AFTER the o	customer has	01
		<b>Examples:</b> Meeting warranty costs.			
	(iii)	<b>Costs of prevention</b> represent the money s problems occurring.	•		0
		<b>Examples</b> : Staff training, design and process		tenance.	
	(iv)	Costs of appraisal are the costs of assessing	g the level of quality achieved.		0
		<b>Examples:</b> Cost of any goods inwards check	s and the costs of any supplier v	etting.	
)	(i)	Calculation of current and reduced total fi	xed cost:	Rupees	
		Operating income	(10,000,000 x 20%)	2,000,000	0
		Operating income per unit	(2,000,000 ÷ 2,000)	1,000	0
		Full cost per unit	(1,000 ÷ 0.1)	10,000	C
		Selling price	(10,000 + 1,000)	11,000	0
		Fixed cost per unit (Full cost-variable cost)	(10,000 - 8,000)	2,000	0
		Current total fixed cost	$(2,000 \times 2,000)$	4,000,000	C
		Reduced fixed cost	(4,000,000 – 200,000)	3,800,000	0
	(ii)	Reduced fixed cost  Calculation of reduced variable cost per utarget mark-up on full cost:		3,800,000	. 0
	(ii)	Calculation of reduced variable cost per utarget mark-up on full cost:  (1) Without advertisement:	nit required to maintain		
	(ii)	Calculation of reduced variable cost per utarget mark-up on full cost:  (1) Without advertisement: Reduced revenues without advertisement		3,800,000	
	(ii)	Calculation of reduced variable cost per usual target mark-up on full cost:  (1) Without advertisement:  Reduced revenues without advertisement  Target full cost at 10% mark-up for reduced	nit required to maintain (11,000 x 1,600)	17,600,000	
	(ii)	Calculation of reduced variable cost per usual target mark-up on full cost:  (1) Without advertisement: Reduced revenues without advertisement Target full cost at 10% mark-up for reduced level	(11,000 x 1,600) (17,600,000 ÷ 1.1)	17,600,000 16,000,000	
	(ii)	Calculation of reduced variable cost per usual target mark-up on full cost:  (1) Without advertisement: Reduced revenues without advertisement Target full cost at 10% mark-up for reduced level Target total variable costs	(11,000 x 1,600) (17,600,000 ÷ 1.1) (16,000,000 – 3,800,000)	17,600,000 16,000,000 12,200,000	
	(ii)	Calculation of reduced variable cost per untarget mark-up on full cost:  (1) Without advertisement: Reduced revenues without advertisement Target full cost at 10% mark-up for reduced level Target total variable costs Target variable cost per unit	(11,000 x 1,600) (17,600,000 ÷ 1.1)	17,600,000 16,000,000

#### **Question No. 5**

### (a) (i) Price proposed by Marketing Manager:

	Rs. per unit	
Direct Material	400	
Conversion	300	
Distribution, Selling & Admin Cost	100	
Total variable cost (per unit)	800	0.5
Mark-up 400%	3,200	1.0
Price proposed by Marketing Manager	4,000	0.5

## (ii) Price proposed by Production Manager:

	Rupees/unit	
Manufacturing	200,100,000	
Selling & distribution	87,050,000	
Administrative	36,050,000	
Total fixed cost (A)	323,200,000	0.5
Units (B)	100,000	
Fixed cost per unit (A÷ B)	3,232	0.5
Variable cost per unit	800	
Full cost per unit	4,032	0.5
Mark-up 55%	2,218	0.5
	6,250	01

		Marks		
) Profit at optimum price:				
MC = MR [at optimum level MR = MC (variable cost per unit)]		0.5		
therefore, $800 = 10,000 - 0.1x$		01		
x = 100,000 - 8,000		0.5		
x = 92,000		0.5		
Putting value of x in price demand equation i.e., p = 10,000 - 0.05(92,000)				
we get price of rupees 5,400 per 'SW'		0.5		
	Rupees			
Contribution at optimum price (5,400 – 800) x 92,000	423,200,000	1.0		
Fixed cost	323,200,000			
Profit at optimum price	100,000,000	1.0		

# Question No. 6

### (a) (i) & (ii)

(b)

		Full Cost	Market Price	
		Tak	as	
Pakistan Spinning Division:				
Division revenues	V. A	*42,000,000	*58,000,000	0.5 + 0.5
Costs:				
Division variable costs	(91/1.3 x 200,000)	(14,000,000)	(14,000,000)	0.25 + 0.25
Division fixed costs	(104/ 1.3 x 200,000)	(16,000,000)	(16,000,000)	0.25 + 0.25
Division operating income		12,000,000	28,000,000	0.5 + 0.5
Income tax at 30%		3,600,000	8,400,000	0.5 + 0.5
Division after-tax operating income		8,400,000	19,600,000	0.5 + 0.5
Bangladesh Denim Division:	•			
Division revenues	(1,000 x 100,000)	100,000,000	100,000,000	0.25 + 0.25
Transferred-in costs (Revenue of spinning division)		(42,000,000)	(58,000,000)	
Division processing costs	(300 x 100,000)	(30,000,000)	(30,000,000)	0.25 + 0.25
Division operating income	•	28,000,000	12,000,000	0.5 + 0.5
Income tax at 25%		7,000,000	3,000,000	0.5 + 0.5
Division after-tax operating income		21,000,000	9,000,000	0.5 + 0.5
Over-all after-tax operating income		29,400,000	28,600,000	0.5 + 0.5

140% of

At 140% of full cost:(195 x 1.4/1.3 x 200,000)= 42,000,000

At Market price:  $(377/1.3 \times 200,000) = 58,000,000$

#### STRATEGIC MANAGEMENT ACCOUNTING [C2] - CHARTERED LEVEL

		Marks
Preference:		
Pakistan Spinning Division	Market Price	0.5
Bangladesh Denim Division	140% of Full Cost	0.5
Transfer-pricing method that will maximize the total after-tax operating income of Bangla Denim Incorporation.	140% of Full Cost	01

				Rupees
	Faisalabad	Lahore	Sialkot	Total
Sales revenue	34,000,000	38,000,000	28,000,000	100,000,000
Cost of goods sold	(17,000,000)	(23,750,000)	(22,000,000)	(62,750,000)
Sales commissions	(1,360,000)	(1,520,000)	(1,120,000)	(4,000,000)
Segment contribution margin	15,640,000	12,730,000	4,880,000	33,250,000
Local advertising	(840,000)	(630,000)	(900,000)	(2,370,000)
Sales manager salary	-	-	(600,000)	(600,000)
Profit margin controllable by segment manager	14,800,000	12,100,000	3,380,000	30,280,000
Rent, taxes, electricity, gas expenses	(1,200,000)	(1,200,000)	(1,200,000)	(3,600,000)
Store manager salaries	(1,500,000)	(1,200,000)	(1,600,000)	(4,300,000)
Other non-controllable costs (traceable)	(100,000)	(200,000)	(280,000)	(580,000)
Segment profit margin	12,000,000	9,50,000	300,000	21,800,000
Less: Common fixed expenses				1,800,000
Net income				20,000,000

**(b)** Sialkot is the weakest segment because of several factors:

(b)

- Faisalabad and Lahore have much higher mark ups on cost [100% (500 / 500) and 60% (300 / 500), respectively]. However, Sialkot's markup is only 27% (150/550)
- Despite being the only store that has a sales manager, and spending considerably more on advertising than Faisalabad and Lahore, Sialkot has the lowest gross rupee sales of the three stores. Sialkot's return on these outlays appears inadequate.
- Sialkot's "other" non-controllable costs are much higher than those of Faisalabad and Lahore.
- (c) Moazzam & Co. uses a responsibility accounting system, which means the managers and centres are evaluated on the basis of items under their control. Since this is a personnel-type decision, the decision should be made by reviewing the profit margin controllable by the store (i.e., segment) manager. The segment contribution margin excludes fixed costs under a store manager's control; in contrast, a store's segment profit margin would reflect all traceable costs whether controllable or not.

#### THE END
